

PAY NO LICENSE FEE!

NEW NGS customers may license Qport Office for two concurrent users without paying a license fee. NGS provides 90 days of technical support as well.

Order your license today at:
www.ngsi.com/company/qportoffice.html

Run Query/400 queries from Windows and output data to Microsoft[®] Excel, Access, and Word in one step.

Do you work in a shop where people still use IBM[®] Query/400 (sometimes referred to as STRQRY or WRKQRY)? You aren't alone. With Qport Office, authorized users can run your legacy Query/400 queries from their Windows desktop. And your accounting department doesn't need to write a check!

- Create and update Excel workbooks, sheets, and named ranges from Query/400 output.
- Create Word documents and Access tables from Query/400 query output.
- Link queries so one mouse click initiates the execution of an entire series of Query/400 queries.
- Leverage the business and database knowledge embedded in your existing Query/400 queries.

You can install Qport Office in seconds. No middleware is required.
