

NGS-IQ | Reporting & Transportation Intelligence for Innovative IES & TL2000

For transportation companies, NGS offers IBM i (AS/400, System i, iSeries) reporting and business intelligence (BI) software that you can use to gain new and valuable insights to:

- Maximize Revenue per Truck, Mile
- Control Truck Costs
- Manage Deadhead Ratios
- Analyze Fuel Mileage and Costs
- Improve Customer Service
- Increase Accountability
- Raise Productivity

Why NGS-IQ™?

The dynamic nature of the transportation industry makes it virtually impossible for any application and software developer to address all of your unique reporting and analytical requirements. *NGS-IQ* complements the capabilities of your *TL2000* or *Innovative IES* software to help you meet these demands.

You can use *NGS-IQ* to produce everything from traditional reports and displays to Web-

based performance dashboards, Microsoft Excel workbooks, OLAP models, graphical Web reports with drill down hyperlinks, Word documents, Access tables, Adobe PDF files, and more. Email, FTP, and smartphone reporting features are included.

NGS-IQ runs on your IBM i but can access data virtually anywhere in your environment (SQL Server, Oracle, MySQL, PostgreSQL, DB2 on other platforms, and more).

The versatile *NGS-IQ* system satisfies the transportation industry's intelligence needs while maintaining data integrity, compliance, and security.

IBM Query/400 users appreciate the way that

I N F O R M A T I O N W H E R E I T C O U N T S

NGS-IQ virtually eliminates the need to write multiple queries and generate work files to produce reports.

NGS also provides a Query/400 API so that you can immediately run Query/400 queries from NGS-IQ and enhance them without a rewrite or conversion effort.

Custom Reports, Analytics: No Waiting

Windows and Web users find the graphical, point-click, drag-drop development features and presentation qualities in NGS-IQ enable them to quickly see business performance trends and exceptions and customize reports without waiting for assistance from the IT staff or a consultant.

Powerful Enough to Tackle Any Database Reporting or Access Challenge

IT professionals find that NGS-IQ's impressive capabilities, performance, and security allow them to tackle even the most demanding database reporting and extraction jobs with confidence and without programming.

Secure, Graphical Web Reporting

The comprehensive Web report design features of NGS-IQ enable developers to easily create a modern reporting interface and make data available in a controlled, secure way that can support end users, auditors, mobile workers, suppliers, customers, and others.

Ready to Roll with TL2000 & Innovative IES

As a TMW Systems Business Partner, NGS has the skills to show you how to use NGS-IQ

with your TMW Systems TL2000 and/or Innovative IES database and other applications.

What Training and Support Is Available?

NGS provides training, consulting, and toll-free hotline support to assist you in getting the most from NGS-IQ. Free trials are available and NGS's specialists are also happy to build proof-of-concept models over your data.

About NGS

NGS was incorporated in 1982 and is based in Sacramento, California, USA. The company is a Premier IBM Business Partner. NGS products are used worldwide in all industries by companies of all sizes.
