

NGS-IQ TOP 10

Top 10 Reasons IBM i Professionals Love NGS-IQ

1. NGS-IQ works directly with DB2 on the IBM i. No need to create a meta-data repository where files are assigned synonym names before they can be queried.
2. NGS-IQ simultaneously supports Windows, Web, and 5250 user interfaces to satisfy all types of users.
3. NGS-IQ easily creates conditionally calculated fields using extensive IF-THEN logic.
4. NGS-IQ's Query/400 API lets you run existing IBM Query/400 queries without modification and e-mail the output directly from the IBM i in formats like PDF, CSV, TXT, and more. You can even schedule the queries to run when needed using IBM or third-party scheduling software.
5. NGS-IQ lets you immediately query the output of one query in another query - you can string multiple queries together and run them in sequence.
6. NGS-IQ provides row (record) and column (field) level security without requiring you to develop User Defined Functions (UDF) and SQL Views.
7. NGS-IQ lets you develop queries on or offline, so you can be productive, even when you can't get to the Web.
8. NGS-IQ supports just about every type of file join you will ever need.
9. NGS-IQ offers flexible licensing terms so you can give development, run-only, online, and offline authority to more users while controlling how many queries concurrently run.
10. NGS offers a business performance dashboard starter kit and packaged analytical templates for financial, sales, customer, inventory and healthcare performance to shorten implementation time.

Top 10 Reasons Business Users Love NGS-IQ

1. NGS-IQ lets you pick the format of your query output at run time so you can direct your query result to Excel, SmartView OLAP, PDF, HTML, printer, display, or other destinations on demand.
2. NGS-IQ offers tremendous integration with Microsoft Excel. Update any worksheet in a workbook, load new data into a named range of a worksheet, load data into one worksheet and trigger Excel to display another, and more.
3. NGS-IQ includes integrated e-mail and FTP as standard features for easy report distribution. No need to buy a separate module.
4. NGS-IQ includes direct output to MS Access, MS Word, CSV, and TXT files.
5. NGS-IQ lets you work in the user interface where you are most productive – Windows, Web browser, or 5250.
6. NGS-IQ provides a rich Windows online analytical processing (OLAP) environment that supports offline information analysis and sharing.
7. NGS-IQ includes a join wizard that remembers how you last joined the files in your query so you don't need to (whether or not you have defined foreign keys in DB2).
8. NGS offers a complete starter kit of dashboard samples and a Web portal you can use to begin developing your own live Adobe Flash-based Web presentations.
9. NGS provides online training, a comprehensive tutorial, and extensive documentation to help you get productive right away. Our product support staff is second to none.
10. NGS-IQ will work for you right now, even if your company isn't running i5/OS V5R4 or 6.1.
