

## Query, Reporting, and Analytics for IBM i Users

### Planning Your Exit from IBM DB2 Web Query

IBM's decision to drop DB2 Web Query caught everyone by surprise. But as IBM said in its announcement letter, there are alternative solutions. We invite you to learn about ours: **NGS-IQ**.

*NGS-IQ* is designed for IBM i and takes advantage of IBM i security and performance. It enables the full range of technical and casual users to query, transform, format, visualize, and share Db2 on i data. *NGS-IQ* simplifies and automates query, reporting, and analytics tasks while leveraging your Microsoft Excel and Power BI skills. It is much more than a simple query tool.

We recognize you may be frustrated by IBM's sudden announcement, but your business needs require you to prepare for migrating to a solution with a future. Please join us and learn how *NGS-IQ* and our technical support and educational services can ease your pain and affordably meet your needs.
