

**A New Year, Big Goals,
Exciting Projects.**

**But What Do Your Users
See?**

It's 2026. You have big plans for your IBM i environment - new technologies, methods, and languages. But what about your users? Are they still seeing reports and displays from outdated or unsupported query and reporting tools?

See how **NGS-IQ** simplifies query, reporting, analytics, and data transfer tasks without requiring a consulting team or large budget.

You and your users will enjoy Microsoft 365 integration, graphical Web displays, multidimensional modeling, report distribution, built-in email, and FTP - with IBM i security and performance.
