

Run-Time Prompting Tips, Translating Data Values, & Microsoft Power BI Quick Insights

In this Webinar for **NGS-IQ** users, we'll cover:

- When record selections or new fields should be used with query run-time prompting
- How NGS-IQ's XLATE function handles inconsistencies in your data.
- How to perform advanced analytics – without any statistics or formulas – by using *NGS-IQ* with Microsoft Power BI's Quick Insights.
